

# Read-ME

---

Project has dependency on google play service.

-To use ant build change the *android.library.reference.1* property to absolute path of goole-paly-service-lib project in **Project.properties** file.

- If fresh installation of google-play-service has been done then its most likely build.xml file is missing in the project.

- **Run:** android update lib-project --path <path to project google-play-service> --target <targetID>
